## WORK EXPERIENCE

---

### CTSI-Global

Feb. 2018 - Mar. 2020

*Front-End Engineer*

*Memphis, TN*

As front-end engineer, I maintained and created user interfaces for web applications with a strong data-entry focus.

- Leveraged Angular's Reactive Forms for data hydration, session statefulness, and custom validation and styling.
- Migrated existing applications from Angular version 5 to 7.
- Migrated from an underperforming third-party UI component vendor to Telerik.
- Brought donuts to share on multiple occasions (just saying).

### Mind Over Data, LLC

Jan. 2017 – Feb. 2018

*Junior Web Developer*

*Memphis, TN*

As a junior web developer, I created user interfaces in Angular at the direction of the senior developer.

- Assisted building chemical formulation and inventory app for client AOC Resins.
- Created a custom ComboBox with auto-complete, async option generation, and keyboard navigation. Faster than the Telerik (Kendo UI) equivalent.
- Replaced a reporting engine UI with a .NET Razor Template page. The main workload was printer CSS styling.

### Musistic, Inc.

May 2015 – Feb. 2016

*Web Developer Intern | Web Developer Staff*

*Memphis, TN*

As a developer at Musistic, I worked on all layers of the stack, working on the main site and the subdomain.

- Created MySQL database schema for messaging and notification systems, and the UI from designer mockups.
- Created a custom audio file uploader that converted the audio format to mp3 and ogg fallback.
- Consumed Facebook API for the Share button feature; made database migration scripts for schema changes.

### University of Memphis

Aug. 2012 – Dec. 2015

*ITS Service Desk Tech | Promoted to Account Assistant*

*Memphis, TN*

- Provided computer lab and over-the-phone technical support to University faculty, students, and staff.

*Department of Computer Science*

- As an upper-division lab assistant, I tutored lower-division students on their coursework.

## EDUCATION

---

### University of Memphis

Dec. 2015

*Bachelor of Science, Computer Science*

*Memphis, TN*

- **GPA: 3.92; Summa Cum Laude**
- CCSC Programming Contests
